

Harshith Vijayan

Arizona Resident |623-218-3539 | hvijayan@asu.edu | <https://github.com/Harshith241>

Education

Arizona State University

Tempe, Arizona

Bachelor of Science in Computer Science (4X Dean's List- 4.0 cumulative GPA) Expected Graduation, May 2028

Linkedin - <https://www.linkedin.com/in/harshithvijayan/>

- **Related Coursework:** Computing in Java, OOP, Data Structures and Algorithms, Discrete Mathematics, Digital Design, Computer Organization & Assembly language, Statistics for engineers, Software Development.

Experience

Tekplanit

Remote

Software Engineering Intern

Dec 2025 - Feb 2026

- Built a dynamic MCP server with **FastMCP** exposing Google Calendar tool schemas like scheduling, rescheduling, cancellations, availability - (<https://github.com/Harshith241/google-calendar-mcp>)
- Architected an AI-powered sales calling agent with **LangChain**, implementing tool-driven reasoning, conversational memory, and modular separation of LLM reasoning and execution layers
- Designed scalable agent workflows for meeting orchestration, automated follow-ups, and enterprise integrations (Anaplan research + **Next.js**). Explored deployment on **AWS (EC2/S3)** with containerized services

ACM at ASU - Industry Coordinator

ASU, Tempe - Jan 2026 - Present

- Grew from **Intern to Contributor to Coordinator** in **3** months by executing end-to-end industry outreaches for our events. Contributed to Globehack, a hackathon that engaged **300+** participants across a weekend
- Sourced and secured **5+** industry speakers and sponsors through targeted outreach to professionals, owning the full pipeline from research to confirmation and directly shaping the future of the club

Publicis Sapient (GCA)

Remote

Full-Stack Developer

March 2025 - May 2025

- Developed personalized booking flows for **3** user archetypes using **Vanilla JS, Bootstrap 5, and OpenLayers**, reducing first-click friction for **65%** of undecided travelers
- Converted Google Slides wireframes into reusable JS modules with **100% unit-test pass rate**, cutting manual prototyping time by **50%**

Projects

Chairside - AI Missed-Call Recovery & Booking SaaS

Phoenix, Arizona - June 2026- Present

- Built and shipped a multi-tenant voice-AI platform that recovers missed calls for dental practices and books appointments autonomously, **onboarded 3 clients**. (Blueprint - <https://github.com/Harshith241/Chairside-API>)
- Architected the full pipeline spanning Twilio, Retell AI, FastAPI on Railway, n8n and Supabase, with per-client isolation on a single multi-tenant deployment. **\$297 MRR** per client.
- Diagnosed and fixed a production timezone bug mangling UTC to Phoenix offsets across the booking flow, hardening endpoints and standardizing phone handling to caller ID as source of truth
- Owned product, engineering, and outreached to practices in Peoria and converted prospects to signed clients.

AR-Enhanced Mobile App (<https://github.com/Harshith241/EPICS-AR>)

Tempe, Arizona Aug 2025-Dec 2025

- Developed a cross-platform **Flutter** app for 500+ visitors of Kebun Raya Balikpapan botanical garden
- Built offline-capable navigation using **GPS + map integration**, reducing wayfinding errors by **30%**
- Collaborated with an 8-member international Agile team using **GitHub & sprint-based development**

Activities and Clubs

Kiro Spark AI Challenge Track winner (\$500 Cash Prize)

ASU, Tempe-April 2026

Principled Innovation Hack (\$250 Cash Prize)

ASU, Tempe-April 2025

DevHacksXStrategy Hackathon- "Best Beginner Hack"

ASU, Tempe-March 2025

Skills

Programming: Python, Java, Kotlin, JavaScript, C++, C#, Swift, Dart, SQL, TypeScript

Frameworks/Technologies: React, LangChain, Angular, .NET (ASP.NET core), Node.js, Git, Docker, AWS

Tools/Platforms: MCP, REST APIs, Supabase, n8n, Twilio, Windows, macOS, Linux, Railway, FastAPI
